Nareg Keledjian

Walnut Creek, CA | Phone: (925) 324-1069 | E-mail: nkeledjian@gmail.com
GitHub: https://github.com/nkeledjian | Portfolio: https://nkeledjian.github.io/nk-portfolio/
LinkedIn: https://www.linkedin.com/in/nareg-keledjian/

Front End Web Developer with experience in psychological research data analysis. Excellent communicator who effectively collaborates with others to ensure common goals. Resourceful problem-solver; open to coaching to learn new skill sets.

Technical Skills:
- HTML, CSS, Bootstrap, Skeleton, JavaScript, jQuery, React, node.js, MongoDB, MySQL

Projects   Role

---

liri | https://github.com/nkeledjian/liri   **Back-End Developer**
An application that searches for music and movies.
- liri provides a one-stop-shop for finding artists' tour dates and album info for songs.
- Users can search movies by title to discover ratings by rotten tomatoes & OMdb, their cast, and year released.
- Built with: node.js, moment.js; APIs: Bands in Town, Spotify, and OMdb, moment.js.

movieNite | https://matchmovienite.herokuapp.com/   **Full Stack Developer**
A movie matching service (UC Berkeley Group Project).
- movieNite aims to help match friends with mutual movie interests based on a survey of movie preferences.
- You will then receive a persona based on your survey responses and can then match with friends via email to get recommended movies.
- Built with: React, Material UI, Ant Design, MongoDB, Mongoose, Auth0

Train Scheduler | https://nkeledjian.github.io/TrainScheduler/   **Full Stack Developer**
A website for keeping track of train and public transportation schedules.
- Users can enter train names, arrival times and frequency.
- The webpage returns information on the next train arrival.
- Built with: HTML, CSS, Skeleton, Google Firebase, jQuery, moment.js

Space Trivia | https://nkeledjian.github.io/SpaceTrivia/   **Front End Developer**
Trivia game that tests your knowledge of space/the cosmos.
- Players click radio buttons corresponding to responses within one minute.
- If players answer all questions or time runs out, a pop up screen will show correct & incorrect answers.
- Built with: HTML, CSS, Skeleton, jQuery

The Explorist | https://carlosfindley.github.io/MTNC/   **Back End Developer**
For helping travelers explore new cities (UC Berkeley Group Project).
- The Explorist is a platform for tourists that provides a historical summary and info about local restaurants.
- Start by entering a city name.
- Click on the search button to get a scenic picture, a historical summary, a map of the city, and popular restaurants in the area.

Memory Game | https://github.com/nkeledjian/memorygame   **Front End Developer**
A game that challenges your memorization skills.
- To play the game, only click new gems. You get 1 point for every new gem you click on.

- If you click the same image twice, your score and the game resets!
- Built with: React/Javascript, CSS

Experience

Customer Support Analyst — ringDNA   **May 2019 - Present**
San Francisco, CA

- Troubleshooting software and telephony hardware issues for end users.
- Escalating software bugs to engineering to expedite detection and debugging of issues.
- Provisioning product licensing for end user access to core software phone functions.
- Onboarding new clients with product demos to help clients become familiar with software phone.

IT Desktop Technician — EMR CPR LLC   **Sept. 2017 - May 2019**
Fremont, CA

- Charged with equipment inventory of systems for transport, confirming an accurate count that provides for the payment outcomes of a project.
- Manage cabling & re-cabling of computer systems, critical for keeping up with project schedule deadlines & providing support for reconnection teams.
